

Later today, Congress is expected to pass the Transportation Equity Act and with it the \$9 million I secured to widen the Route 60 bridge over the Tri-State Tollway. The project will reduce accidents caused by ramp traffic backing up onto I-94 and reduce congestion by eliminating delays on I-94 and Route 60. Both of these thoroughfares serve vital commercial establishments and are critical to the National Highway System. I look forward to working with local officials in implementing this project next year.
